

Get Expert Turf Advice.

Gilba Solutions Pty Ltd are based just outside Sydney and this outlines who we are and what we do. Gilba Solutions are [independent sports turf consultants](#), and are the Premier turfgrass agronomists in NSW and the ACT.

Our Head Office is in Bowral, NSW, between Canberra and Sydney, and only a 1 hour 15 minute drive from The Sydney Domestic Airport.

Since 2013 we have had one philosophy. To meet our customer needs, and cut through the misinformation that exists in this industry. That's why most of our business is from repeat clients and referrals.

What is a Turf Agronomist?

A qualified turf agronomist has a University Degree in agricultural Science, Soil Science or Agronomy. Turfgrass agronomy considers all the factors that impact on turfgrass growth and its performance.

A turfgrass agronomist:

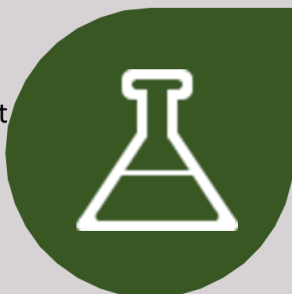

Is aware of all turf grass varieties and cultivars, and how to manage them.

Is able to identify turfgrass diseases and pests, and advise how to control them.

Has good knowledge about the formulation, manufacture and use of turfgrass fertilizers.

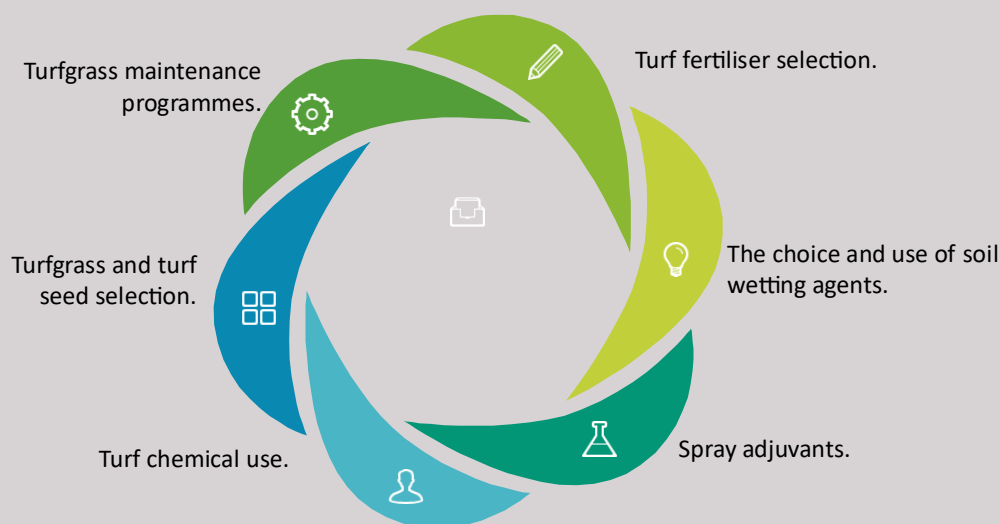

Has an in depth understanding of soil physics and soil chemistry.

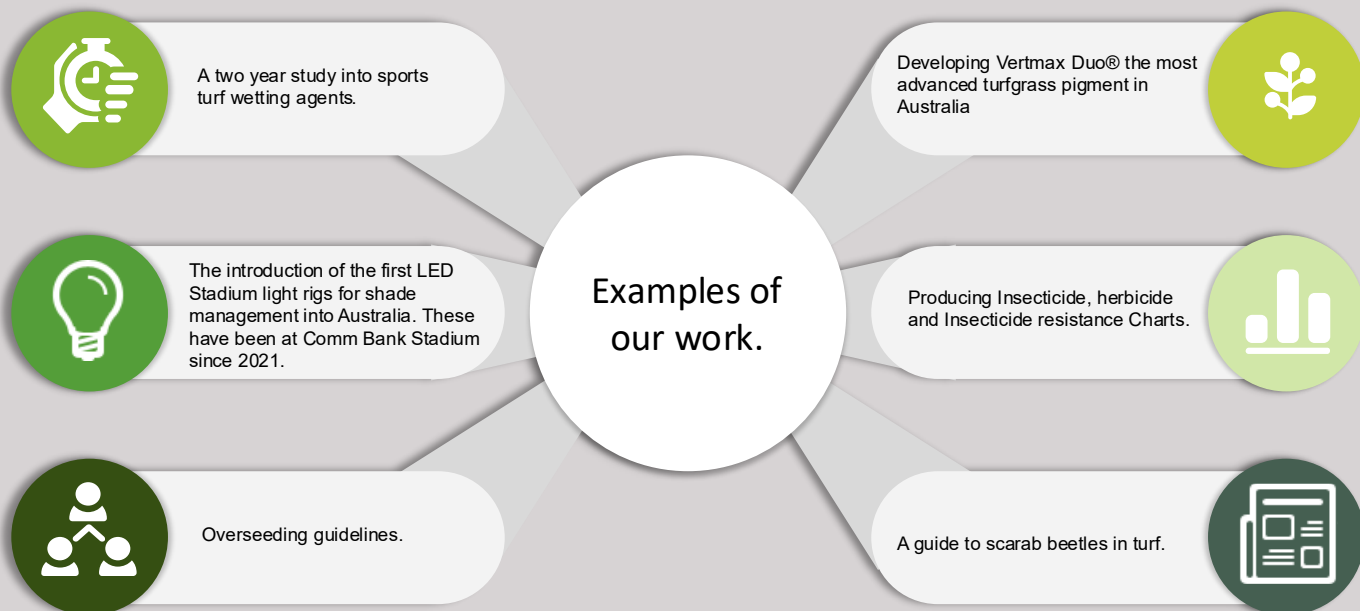

Our Head Agronomist, [Jerry Spencer](#) has over 35 years of experience in Australia and the UK. He has held managerial roles with companies such as: Arthur Yates, Samsung Australia, Paton Fertilizers and the Sports Turf Research Institute (STRI).

Sydney based Gilba Solutions, are in a unique position to offer you the best independent agronomic advice. This includes:

We take immense pride in being the premier turfgrass agronomists in Sydney, NSW and providing independent economical and practical solutions.

Our History

The founder **Jerry Spencer** has a *Hons Degree* in Soil Science from Newcastle Upon Tyne University, and a Grad Diploma in Marketing from UTS in Sydney.

"The cornerstone of our business is and always will be the customer. Being able to provide innovative turf-specific solutions is something we feel we are uniquely able to achieve."
